Animal Lab Training on Deep Venous Thrombectomy and Stenting

Scope: Training workshop on Venous Thrombectomy and Stenting for the Students of the MSc Programme

Workshop Location: Biomedical Research Foundation Academy of Athens – Animal Lab Facilities, <http://www.bioacademy.gr/about>

Experiment: Iliocaval DVT will be provoked through internal jugular vein access. Students will be instructed and guided on how to use the Aspirex catheter to perform thrombectomy. They will have at least 3-5 min each to get hands on and use the device. Venous VENOVO stents will be demonstrated and deployed.

Date: December 19, 2022

Group/Team A: 5 Students (7:45 – 11:00)

7:45-8:00

Introductory remarks

All faculty

8:00-8:15

Venous Thrombectomy with Aspirex:
Current Evidence and Technique

T. Bisdas

8:15-8:30

Venovo Venous Stent: Vernacular Trial and
Technical Tips

E. Avgerinos

8:30-9:00

Hands on Venovo stent - Aspirex and other
BD Medical Products

9:00-11:00

Animal Lab - Demonstration and Practice

E. Avgerinos, T. Bisdas

Group/Team B: 5 Students (11:00 – 14:15)

11:00-11:15

Introductory remarks

All faculty

11:15-11:30

Venous Thrombectomy with Aspirex:
Current Evidence and Technique

T. Bisdas

11:30-11:45

Venovo Venous Stent: Vernacular Trial and
Technical Tips

E. Avgerinos

11:45-12:15

Hands on Venovo stent - Aspirex and other
BD Medical Products

12:15-14:15

Animal Lab - Demonstration and Practice

E. Avgerinos, T. Bisdas
